

PROTECTIVE HAND HAMMER Réf.: 0002459301

Caracteristics

Robustness and durability. The Hickory wooden handle has many advantages: perfect comfort, suppleness... but it can be damaged by false blows. Mob's innovative solution is a shock-absorbing metal bushing. Unalterable, it extends the life of the hammer. Optimum safety The bushing is not simply a ring added to the underside of the head: it passes through the head and is pressed in at the same time as the handle, guaranteeing optimum press-in resistance and an unremovable bushing. Features High-carbon steel socket, chrome finish. Through socket visible on top. Round steel wedge. Hydraulic socket with pressure control sensor. Manufacture This hammer is made entirely in our factory in Le Chambon Feugerolles in France, using our unique expertise.
