TECHNICAL SHEET

COMBINATION WRENCHES SETS IN BOXES Réf.: 9000000401

Caracteristics

Durability and performance: mob wrenches are characterized by their long service life. This durability is achieved through the use of forged steel alloyed with chromium and vanadium. Controlled heat treatment gives it the hardness to withstand high stresses / Wrench openings are made by broaching, a technology that produces very precise dimensions with a high-quality surface finish / The profile of the polygonal heads has been specially designed to avoid damaging nut angles. The strength of mob wrenches far exceeds ISO standard specifications // Precision and strength: Tools precisely adjusted to the dimensions of the nut / Strength far superior to the standard / Ease of use: Ergonomic, non-sharp wrench body for a good grip // Protective profile: Specially designed profile on the eye of the wrench to prevent deformation of nuts. When force is applied, pressure is not exerted on the corners but on the sides of the nut. 30° angle of recovery - 15° angle of inclination for use in tight spaces // Practical: Reliefs and soft markings made by cold forging for tactile comfort and easy cleaning. NF ISO 1711-3318-691 / DIN 899-3113. Made in our factories in Europe.
