

DIAGONAL CUTTING PLIERS Réf.: 9305140401

Characteristics

Sleeve ergonomics: a marked guard for improved grip, bi-material polypropylene and neoprene for grip. The sleeves are resistant to the products used in industry: hydrocarbons, acetone, chlorotene, etc. Carpal tunnel syndrome is a major MSD. The area is therefore not spatulated, but the length of the sleeve is increased and the carpal tunnel area is simply avoided by tapering the pliers at the end. CUTTING All cutting pliers have an offset axis for maximum leverage, known as HIGH LEVERAGE: the axis of the joint is raised as close as possible to the cutting edge. Superior steel quality: Chrome Molybdenum, an alloy renowned for its high mechanical qualities, and in particular its toughness. Hardened cutting edges for longer life. Cutting pliers are designed to cut all types of wire and strip: strip, steel or nylon, Ertalon, Nylatron, copper wire, bronze, hard, medium-hard or even piano wire. FINISH Premium range pliers have a top-of-the-range chrome finish. Chrome plating increases surface hardness and protects against corrosion. NF ISO 9654/5749 - DIN ISO 5238.
